10 Action plan . . . 10
11 Traceability from DT findings to project documents . . . 10

List of Figures

1 The Double Diamond and where each section of this report fits 1
2 Desirability vs. feasibility of each idea 8

1 Introduction

[This report documents the Design Thinking (DT) custom document for the Fall term. It follows the steps of the DT worksheet from tutorial T03: prepare, interview, ideate, prototype, get feedback, and reflect. The raw worksheet slides (.pptx and .pdf) are also committed alongside this file (Appendix A). —TPLT]

1.1 Purpose

[Why the team did Design Thinking: to understand the people FitFolio is for, and their current way of tracking fitness and learning about investing, before committing to requirements. —TPLT]

1.2 Scope

[What this report covers, and what it does not. The course asks for the interview, ideation and two prototype stages only (the "Design the Right Thing" diamond plus first prototypes), not the full DT process. —TPLT]

1.3 Design Thinking Process

[Briefly describe the Double Diamond (Discover, Define, Develop, Deliver) and map each section of this report to its phase. Keep or edit the figure below. —TPLT]

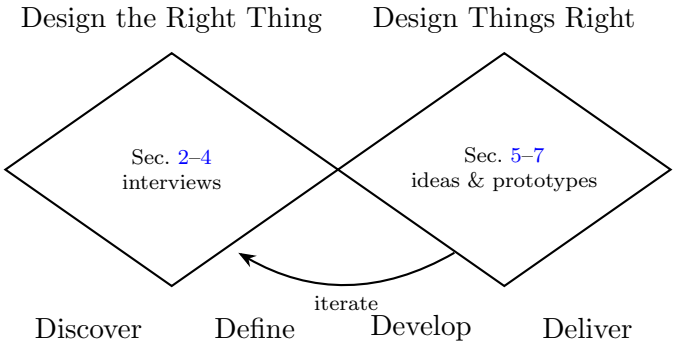

Figure 1: The Double Diamond and where each section of this report fits

1.4 Relation to Other Documents

[Which documents use the DT findings: SRS Section 3 (Stakeholder Requirements) and Section 4 (User Personas), and V&V Plan Section 3 (Custom Documents) and validation. Section 8 gives the full traceability. —TPLT]

1.5 Participant Identifiers

[Participants are referred to only by ID (P01, P02, ...), as in the SRS. List each ID with a non-identifying description (e.g. "university student, tracks runs with a phone app") and the interview date. —TPLT]

Table 2: Interview participants

ID	Date	Description (non-identifying)
PP	Date	Practice interviewee (outside the team)
P01	Oct 14, 2026	[TODO: description]
P02	Oct 14, 2026	[TODO: description]
P03	Date	[TODO: optional third participant, or delete this row]

2 Interview Preparation

2.1 Target Users and Interview Goals

[Who the 2–3 potential users are (peers, the supervisor) and why they were chosen. State the two goals from the worksheet: (1) understand the problem, meaning their current day-to-day solution and its problems; and (2) decide what value we can add without getting in the way of their current routine. —TPLT]

2.2 Domain Research

[Research done before the interviews, so we understand the fitness and personal-finance domains. Answer the worksheet's questions below. —TPLT]

2.2.1 Usual Practices

[How people usually track fitness (phones, watches, apps), and how beginners usually start investing (TFSAs, ETFs, paper trading, ...). —TPLT]

2.2.2 Common Problems

[Common problems people have in these domains (e.g. losing motivation, fear of losing money, information overload). —TPLT]

2.2.3 Existing Solutions

Table 3: Existing solutions in the fitness and investing domains

Product	What it does well	Gap FitFolio could fill
[TODO: App 1]		
[TODO: App 2]		
[TODO: App 3]		

2.3 Introduction Script

[What we say to an interviewee to explain why we are excited about this problem area and why we need their help. Quote it word for word. —TPLT]

[TODO: Intro script]

2.4 Privacy and Ethics

[How we protected participants: what we did *not* collect, how transcripts were de-identified (IDs only), consent, and no questions that are too personal or unrelated to the problem, such as specific health conditions or account balances. —TPLT]

3 Interview Questions

3.1 Initial Questions

[Open-ended questions to guide the interview. Follow-up questions asked during the interview should be written down too. —TPLT]

Q1. [TODO: Question]

Q2. [TODO: Question]

Q3. [TODO: Question]

Q4. [TODO: Question]

Q5. [TODO: Question]

Q6. [TODO: Question]

Q7. [TODO: Question]

3.2 Practice Interview

[Practice interview with someone outside the team, to "debug" the questions. One or two people interview and at least two take notes. —TPLT]

3.2.1 Practice Notes

[Summary of what they said. —TPLT]

3.2.2 Practice Empathy Map

Empathy Map — Practice interviewee (PP)

Say *What they said, in answer to questions or unprompted.* • [TODO:]	**Think** *What we infer about their knowledge or opinions.* • [TODO:]
Do *The steps they take to do the task we want to improve.* • [TODO:]	**Feel** *What we infer about their feelings, e.g. toward a proposed solution.* • [TODO:]

3.2.3 Interview Skills Self-Assessment (Practice)

[Mark one option per row with \sel{}. —TPLT]

Table 4: Interview skills self-assessment, practice interview

Did you...	**Choose one**		
Set up the interview, giving context?	Somewhat	Yes	Definitely!
Make them comfortable?	Somewhat	Yes	Definitely!
Ask open-ended questions?	Never	Sometimes	Whenever appropriate
Ask follow-ups?	Never	Sometimes	Whenever appropriate
Ask how they felt about things?	Never	Sometimes	Whenever appropriate
Ask for stories, or the steps of a task?	Never	Sometimes	Whenever appropriate
React to non-verbal cues?	Never	Sometimes	Always

3.3 Revised Questions

[Questions after the practice run. Note what changed and why (e.g. "Q3 was too leading, so it was reworded"). —TPLT]

Q1. [TODO: Question]

Q2. [TODO: Question]

Q3. [TODO: Question]

Q4. [TODO: Question]

Q5. [TODO: Question]

Q6. [TODO: Question]

Q7. [TODO: Question]

4 User Interviews

[One subsection per participant. Keep transcripts de-identified. Copy the P01 block for each additional participant. —TPLT]

4.1 Participant P01

4.1.1 Context

[Date, format (in person or online), interviewer(s), note-takers, and how long it took. —TPLT]

4.1.2 Transcript Summary

[Key answers per question; short quotes are fine. —TPLT]

4.1.3 Empathy Map

Empathy Map — P01

Say *What they said, in answer to questions or unprompted.* • [TODO:]	**Think** *What we infer about their knowledge or opinions.* • [TODO:]
Do *The steps they take to do the task we want to improve.* • [TODO:]	**Feel** *What we infer about their feelings, e.g. toward a proposed solution.* • [TODO:]

4.2 Participant P02

4.2.1 Context

[Date, format, interviewer(s), note-takers, and how long it took. —TPLT]

4.2.2 Transcript Summary

[Key answers per question. —TPLT]

4.2.3 Empathy Map

Empathy Map — P02

Say *What they said, in answer to questions or unprompted.* • [TODO:]	**Think** *What we infer about their knowledge or opinions.* • [TODO:]
Do *The steps they take to do the task we want to improve.* • [TODO:]	**Feel** *What we infer about their feelings, e.g. toward a proposed solution.* • [TODO:]

4.3 Participant P03 (Optional)

[Delete this subsection if only two interviews were held. If we interview a beginner investor, this closes the gap noted in the V&V Plan. —TPLT]

4.4 Interview Skills Self-Assessment

Table 5: Interview skills self-assessment, real interviews

Did you. . .	**Choose one**		
Set up the interview, giving context?	Somewhat	Yes	Definitely!
Make them comfortable?	Somewhat	Yes	Definitely!
Ask open-ended questions?	Never	Sometimes	Whenever appropriate
Ask follow-ups?	Never	Sometimes	Whenever appropriate
Ask how they felt about things?	Never	Sometimes	Whenever appropriate
Ask for stories, or the steps of a task?	Never	Sometimes	Whenever appropriate
React to non-verbal cues?	Never	Sometimes	Always

4.5 Key Insights

[Converge (the "Define" phase): the themes that came up across participants. Give each insight an ID (I1, I2, . . .) so later sections and the SRS can trace to it. —TPLT]

Table 6: Key insights from the interviews

ID	Insight	Source
I1	[TODO: Insight]	P01, P02
I2	[TODO: Insight]	P01
I3	[TODO: Insight]	P02

5 Ideation

5.1 Idea Generator

[Structured brainstorming. Put two aspects of the problem on the axes (e.g. user pain points from Section 4.5 × app areas or user goals) and fill in **all 16 cells**, even if some ideas are crazy or unrealistic. —TPLT]

Table 7: Idea Generator

	A. [TODO: Aspect]	**B.** [TODO: Aspect]	**C.** [TODO: Aspect]	**D.** [TODO: Aspect]
1. [TODO: Aspect]	A1:	B1:	C1:	D1:
2. [TODO: Aspect]	A2:	B2:	C2:	D2:
3. [TODO: Aspect]	A3:	B3:	C3:	D3:
4. [TODO: Aspect]	A4:	B4:	C4:	D4:

5.2 Desirability vs. Feasibility

[As a group, go through the ideas in reverse order and score each one from 1 to 10. Feasibility: how possible it is to build with our resources. Desirability: how much impact it would have on the user, supervisor or client. The best ideas end up near the top-right of the plot. —TPLT]

Table 8: Desirability and feasibility scores

Idea	Desirability (1–10)	Feasibility (1–10)	Notes
A1			
...			
D4			

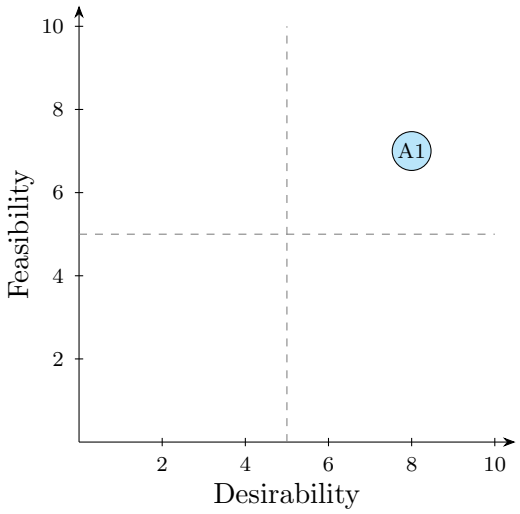

Figure 2: Desirability vs. feasibility of each idea

5.3 Selected Ideas

[The two best ideas, which become Prototype 1 and Prototype 2. For each one, say why it was chosen (its scores and the insights it addresses) and what we want to learn from testing it. —TPLT]

Prototype 1 (XX): [TODO: idea, rationale, what we hope to learn]

Prototype 2 (XX): [TODO: idea, rationale, what we hope to learn]

5.4 Discussion Points

[Questions raised by this process that we parked for later, e.g. parts of what we learned that we don't yet know how to build. —TPLT]

6 Prototypes

[Low-fidelity (paper or tablet) prototypes. Focus on how they work, not how they look; give users enough to react to. Put images in `figures/` and add one figure per screen or action. —TPLT]

6.1 Prototype 1: [TODO: Name]

[Describe the flow, then add the screens. —TPLT]

6.2 Prototype 2: [TODO: Name]

[Describe the flow, then add the screens. —TPLT]

7 Prototype Feedback

[Feedback sessions with 2–5 users (the supervisor counts). One person talks and at least one takes notes, steering the conversation so all four areas get covered. —TPLT]

7.1 Prototype 1 Feedback

Feedback Grid — Prototype 1, [TODO: participant ID]

(+) Liked *What did they like about it?* • [TODO:]	**(Δ) Change** *What would they like changed?* • [TODO:]
(?) Questions *What questions did they ask?* • [TODO:]	**(!) Ideas** *What new ideas came out of the discussion?* • [TODO:]

7.2 Prototype 2 Feedback

Feedback Grid — Prototype 2, [TODO: participant ID]

(+) Liked *What did they like about it?* • [TODO:]	**(Δ) Change** *What would they like changed?* • [TODO:]
(?) Questions *What questions did they ask?* • [TODO:]	**(!) Ideas** *What new ideas came out of the discussion?* • [TODO:]

7.3 Prototype Comparison

Table 9: Pros and cons of each prototype

	Prototype 1	Prototype 2
Pros	[TODO:]	[TODO:]
Cons	[TODO:]	[TODO:]

[What did we learn about the prototypes? Do we refine one, combine them, or go in a new direction? —TPLT]

7.4 Action Plan

[How the next prototype, and the real app, will change based on the feedback and our pros and cons. —TPLT]

Table 10: Action plan

What they/we said	How we will improve
[TODO: Feedback]	[TODO: Change]

8 Traceability to Other Documents

[Every design decision should trace back to "ground truth": something a user or the supervisor said, or a constraint they set. Link each insight or piece of feedback to the SRS or V&V items it informed. —TPLT]

Table 11: Traceability from DT findings to project documents

DT item	Finding	Informs
I1	[TODO:]	SRS Sec. 3, [TODO: stakeholder requirement ID]
I2	[TODO:]	SRS Sec. 4, Persona 1
Action plan row 1	[TODO:]	SRS [TODO: FR ID]

9 Reflection on the Design Thinking Process

9.1 What parts of this process were difficult, and how did we overcome them?

[Team answer. —TPLT]

9.2 How did this process help us understand our users and the problem better?

[Team answer. —TPLT]

9.3 How will we use what we learned in our future careers as software engineers?

[Each member answers individually. —TPLT]

Davis Lenover: [TODO:]

Preston Grewal: [TODO:]

Angad Chhabra: [TODO:]

Farid Bastoros: [TODO:]

Zaid Alsaadi: [TODO:]

A Appendix — DT Worksheet Slides

[The course requires the raw worksheet slides in the repo as both .pptx and .pdf. Link them here, or include the PDF with the `pdfpages` package. —TPLT]

- `docs/CDs/DesignThinking/DesignThinkingWorksheet.pptx`
- `docs/CDs/DesignThinking/DesignThinkingWorksheet.pdf`

B Appendix — Generative AI Use Disclosure

[Same structure as the Hazard Analysis disclosure. —TPLT]

B.1 AI Tools Used

B.2 How and Where Used

B.3 Verification of AI-Generated Content
